# ORGANIC HONEY

Is collected from the South of Armenia, from the highlands of Syunik region. The numerous layers of the regional flora that live in desert and semi-desert to pre-alpine and alpine surface at a height of 300-2800 meters above the sea level, constitute the main peculiarity of our honey. Thus, in every jar of our honey you will discover the whole range of aromas and tastes found within the Armenian wilderness and nature. Every regional flower and plant, from which the bees collect nectar, has medical and healing properties that have long been used to treat various illnesses.

Our bees live and carry out their daily activities in the heartlands of virgin nature, in an environment that is far from settlements and highways. The beehives are only made of natural wood. In order to prevent and, if necessary, to treat bee diseases we use medication that is acceptable in the organic agriculture and is exclusively made from herbal constituents. What is more, the bees are always left with natural honey for wintertime.

Our organic honey does not contain any syrups, colorants and additives. This is ensured by the results of our honey analyses that are annually carried out by the German QSI laboratory and presented to our consumers, those who appreciate the quality of our honey.

## Nutrition Facts

Serving Size: 1 tbsp (21 g)  
Serving Per Container: about 23,8

Amount/Serving		Calories from Fat 0
